

Lucretia Sign Double-Sided LED Sign

The Double-Sided LED Sign is a compact and stylish projecting display, featuring two high-brightness P3 indoor LED panels (384mm × 384mm each). Designed for wall-mounted installation, this unit delivers dynamic video, images, and text content on both sides—ideal for maximizing visibility in corridors, entrances, and retail storefronts.

Built with a sleek aluminum housing, it includes a built-in media player and supports wireless content updates via mobile app, making it a plug-and-play solution for modern signage applications.
