

Lucretia Sign LED Banner Screen

The LED Banner Screen is a sleek, ultra-wide indoor digital display designed for creative and impactful branding. Featuring a slim P2.5 high-resolution LED panel, it supports full-color video, images, and scrolling text to suit a wide range of applications.

Customizable in length, this screen can be tailored to fit various spatial requirements—from short retail shelves to long feature walls—making it a flexible signage solution for modern commercial interiors.

Built-in wireless control via mobile app allows easy content updates, with no external control system required.
