

## Lucretia Sign LED Cube Display

---

The LED Cube Display is a striking, multi-sided digital signage solution designed for immersive brand presentation and spatial engagement. Built using high-resolution P3 full-color LED panels (384mm × 384mm per face), this modular cube screen offers a dynamic 360° viewing experience from multiple angles.

The unit is available in multiple configurations to suit diverse commercial applications:

- Designed for suspended installation, with all five visible faces for full spatial impact.
- Ideal for corner or sidewall installations where overhead mounting isn't feasible.
- Engineered with enhanced weather resistance for outdoor commercial and public use.
- Upgraded with GOB (Glue on Board) technology for superior impact resistance, dustproofing, and durability.

All versions support video, image, and text playback, and can be updated wirelessly via mobile app. The built-in media player ensures plug-and-play convenience with no additional hardware required.
