

Lucretia Sign LED Pillar Screen

The LED Pillar Screen is a slim, modular digital display composed of three vertically stacked indoor LED panels. With a high-resolution P2.0 full-color display (480mm × 640mm per panel), it is designed to deliver impactful visual content in a compact footprint.

This versatile unit can be used as a freestanding display, wall-mounted, or vertically suspended, making it ideal for creative retail environments, showrooms, hotel lobbies, and brand installations. It supports video, image, and text playback, and can be updated wirelessly via mobile app with no external control system required.

- Slim vertical display with 3 modular LED panels
- P2.0 high-resolution indoor LED screen
- Supports video, images, text, and dynamic animations
- Multiple installation options: freestanding, wall-mounted, or suspended
- Wireless content control via mobile app
