

Lucretia Sign LED Poster Display

The LED Poster Screen is a high-resolution indoor digital display designed for eye-catching advertising and information display. It features a slim freestanding design with a vivid full-color P2.5 LED panel (800×1920mm), supporting video, images, and text playback.

This versatile screen can be used as a standalone digital poster or seamlessly spliced with multiple units to form a larger synchronized video wall. With a built-in media player and wireless content control via mobile app, it offers plug-and-play simplicity with powerful performance.

Key Features:

- P2.5 full-color indoor LED display
- Supports video, images, text, and animations
- Freestanding design – no installation required
- Wireless content update via mobile app
- Built-in player – no external controller needed
- Supports multi-screen splicing for video walls
- Ideal for retail, exhibitions, hotels, events, and corporate environments
